

At-Home Safe Food Handling: It's in Your Hands.

Consumer Food Safety

hen it comes to safe food handling and preparation in your home, you're in control. Your home is the final stop in the farm-to-table continuum, and safely handling food is your best protection against foodborne illnesses.

To stop microorganisms, follow these four food safety concepts:

CLEAN. Wash hands and surfaces often.

CHILL. Refrigerate promptly.

SEPARATE. Don't cross-contaminate.

COOK. Cook to proper temperatures.

This publication outlines food handling practices from store to table, plus the use of leftovers. The four food safety concepts above are important in several of these steps, so watch for the symbols marking Clean, Chill, Separate, and Cook. Most instances of foodborne illnesses are preventable, so remember, you control at-home food safety. It's in your hands!

SHOPPING

At-home safe food handling begins with grocery shopping. Bacteria grow well in warmer temperatures, so it's important to not allow cold or frozen foods to increase in temperature before you reach home.

■ Grocery shop last to avoid leaving food in a hot car.

■ Take food straight home after shopping and immediately refrigerate cold items. In hot weather, pack cold foods in ice if the time from the store to home will be more than one hour.

- Place raw meat, poultry, fish, and seafood inside plastic bags found in the meat aisle to avoid contamination from drippings. Keep them separate from other food items in your cart.
- Watch food condition. Don't buy canned goods with large dents, cracks, or bulges. Be sure refrigerated food is cold to the touch and frozen food is rock-solid.

■ Avoid buying fresh meat, poultry, fish, or shellfish from temporary stands.

UICKTIP. Watch for these dates on food:

"Sell by" is the last date a store should sell a product.

"Best if used by" means the quality of food goes down after this date

Dates are quality indicators, not safety dates.

STORING

Refer to Chart #1: Refrigerated Storage Guidelines.

■ To slow bacterial growth, keep your refrigerator running at 40°F, or even colder, without freezing your milk or lettuce. Keep freezers at 0°F for best food quality. Check the temperature of your refrigerator and freezer with a thermometer.

- Place raw meat, poultry, fish, or shellfish on a plate or in a plastic bag, and on a lower refrigerator shelf, to avoid contaminating other foods with drippings.
- Cover all foods to protect them from drips and to hold quality.
- Freeze fresh meat or poultry immediately if you won't use it within a few days.

PREPARING

- Handwashing is one of the best ways to help prevent foodborne illnesses. Always wash your hands in hot, soapy water for 20 seconds:
 - Before preparing food
 - After handling raw meat, fish, seafood, or poultry
 - After using the toilet
 - After changing a diaper
 - After handling pets, pet food, or cat litter
 - After handling the trash
 - After coughing, sneezing, or using a tissue
- Frequently wash and change kitchen towels, sponges, and cloths.

■ Wash cutting boards, dishes, utensils, and countertops with hot, soapy water after preparing different food items, especially raw meats and poultry. Spray surfaces with a simple solution of 1 tablespoon regular chlorine bleach in 1 gallon water. Label spray bottle "sanitizer."

UICK TIP. Encourage proper handwashing with younger children by having them sing the "Alphabet Song" once. Washing hands for 20 seconds is effective in removing germs from hands.

■ Thaw meat or poultry in the refrigerator, microwave or under cold running water in your kitchen sink. Then, cook immediately.

■ Use acrylic cutting boards instead of wooden boards. Acrylic boards can be washed in the dishwasher. Replace when surface becomes rough.

■ Marinate raw meat and vegetable products in the refrigerator. Never reuse marinade; dispose of it down the drain.

- Keep raw meat and its juices away from other foods.
- Do not wash raw meats before cooking. This could splash bacteria to other foods and surfaces.

QUICK TIP. To help avoid cross-contamination of food, obtain two acrylic cutting boards of different colors or shapes. Use one for raw meats and poultry, the other for fruits and vegetables.

COOKING

Refer to Chart #2: Cooking Temperature Guide for Meats and Eggs.

CHART #1 REFRIGERATED STORAGE GUIDELINES Use these short, but safe, time limits to keep your refrigerated food (40°F or colder) from spoiling or becoming harmful to eat.		
FRESH MEAT (BEEF, VEAL, LAMB, AND PO	RK)	
Steaks, chops, roasts	3 to 5 days	
Variety meats (tongue, kidneys, liver, heart, chitterlings)	1 to 2 days	
RAW HAMBURGER, GROUND AND STEW M	EAT	
Stew meats	1 to 2 days	
Ground beef, turkey, veal, pork, lamb, and mixtures of them	1 to 2 days	
FRESH POULTRY		
Chicken or turkey, whole	1 to 2 days	
Chicken or turkey, parts	1 to 2 days	
Giblets	1 to 2 days	
FISH AND SHELLFISH		
Fresh fish and shell fish	1 to 2 days	
MEAT LEFTOVERS		
Cooked meat and meat dishes	3 to 4 days	
Gravy and meat broth	1 to 2 days	
SOUP AND STEW LEFTOVERS		
Vegetable or meat-added	3 to 4 days	
COOKED POULTRY, LEFTOVERS		
Fried chicken	3 to 4 days	
Cooked poultry dishes	3 to 4 days	
Pieces, plain	3 to 4 days	
Pieces covered with broth, gravy	1 to 2 days	
Chicken nuggets, patties	1 to 2 days	
HAM, CORNED BEEF	c. 7 l	
Corned beef in pouch with pickling juices	5 to 7 days	
Ham, canned, labeled "Keep Refrigerated" unopened	6 to 9 months	
opened	3 to 5 days	
Ham, fully cooked, whole	7 days	
Ham, fully cooked, half	3 to 5 days	
Ham, fully cooked, slices	3 to 4 days	
BACON AND SAUSAGE	1 5 to 1 days	
Bacon	7 days	
Sausage, raw from meat or poultry	1 to 2 days	
Smoked breakfast links, patties	7 days	
Summer sausage labeled "Keep Refrigerated"		
unopened	3 months	
opened	3 weeks	

HOT DOGS AND LUNCH MEATS		
Hot dogs		
opened package	1 week	
unopened package	2 weeks	
Lunch meats		
opened package	3 to 5 days	
unopened package	2 weeks	
DELI AND VACUUM-PACKED PRODUCTS		
Store-prepared (or homemade) egg, chicken, tuna, ham, macaroni salads	3 to 5 days	
Pre-stuffed pork and lamb chops, chicken breasts stuffed w/dressing	1 day	
Store-cooked convenience meals	3 to 4 days	
Commercial brand vacuum-packed dinners w/ USDA seal,	,	
unopened	2 weeks	
MAYONNAISE (COMMERCIAL)		
Refrigerate after opening	2 months	
EGGS	T	
Fresh, in shell	3 to 5 weeks	
Raw yolks, whites	2 to 4 days	
Hard cooked, then refrigerated	1 week	
Liquid pasteurized eggs or egg substitutes		
opened	3 days	
unopened	10 days	
Cooked egg dishes	3 to 4 days	
DAIRY PRODUCTS	10. 1	
Milk	10+ days	
Butter	1 to 2 weeks	
Cheese	any and manually	
Harder cheeses Softer cheeses, after opening	several months 1 to 3 weeks	
Sour cream	1 month	
Yogurt	10 days	
~	10 days	
FRUITS (WHOLE) Storage time may vary depending on the condition		
of fresh fruit when purchased.	1 .	
Apples	weeks	
Bananas (only refrigerate ripe bananas)	few days	
,	at room temp.	
Cantaloupes	few days	
Grapes	few days	
Grapefruit	1 week+	
Oranges	weeks	
Peaches	few days	
Pears	1 to 2 weeks	
Strawberries	few days	
Watermelons	few days	
Materineions	to 1 week	

■ Cook food thoroughly to kill bacteria. Don't chance illness by eating meat, poultry, fish, and shellfish (including oysters), or eggs that are raw or only partially cooked.

■ Roast meat or poultry in oven temperatures of 325°F or greater.

■ Keep the temperature chart (Chart #2) in your kitchen and refer to it when you cook.

SERVING

■ **Don't cross-contaminate.** Keep raw and cooked meat, poultry, fish, and seafood separate. Never place cooked food on an unwashed plate that previously held raw meat, poultry, fish or seafood.

■ Promptly refrigerate. Never let food sit out of the refrigerator for more than two hours when preparing, serving, and eating. (At summer outings, when temperatures are 90°F and greater, let food sit out no more than 1 hour.)

VEGETABLES		
Storage time may vary depending on condition		
of fresh vegetables when	•	
Bell peppers	up to 5 days	
Sen peppers	in a plastic bag	
Broccoli	less than 4 days, unwashed	
	in a plastic bag	
Carrots	3 to 4 weeks stored un-	
	washed in a plastic bag	
Cauliflower	1 week in a plastic bag;	
	use as soon as possible 2 weeks in plastic	
Celery	container	
Cucumbers, whole	1 week, unpeeled	
Green beans	3 to 5 days, unwashed	
Green beans	7 to 10 days, unwashed;	
Green onions (scallions)	use as soon as possible	
Leafy greens	3 to 5 days in plastic bag	
Lettuce	5 to 5 days in plastic bag	
whole:	1 week or so	
precut (bagged):	3 to 5 days, opened	
p.ccat (augges).	7 to 10 days, unopened	
	or date on bag	
	use within 1 or 2 days;	
Mushrooms	store in paper bag	
	will keep for weeks in	
Onions	a cool, dry, dark place;	
Onions	refrigerate cut onions in	
	a covered container	
	do not refrigerate; will	
Potatoes	keep in a cool, dry, dark	
	place for up to 2 months	
Radishes	up to 2 weeks	
Spinach	2 to 3 days, rinsed	
	and drained	
Summer squash	up to 2 weeks	
Sweet corn	keep refrigerated;	
Tomatoes	use as soon as possible	
	for best quality, do not	
	refrigerate whole toma- toes; store at room temp.	
	until ripe, then eat im-	
	mediately; refrigerate cut	
	tomatoes	
	1	

CHART #2 COOKING TEMPERATURE GUIDE FOR MEATS AND EGGS

Note: These are endpoint cooking temperatures for safety. You may choose to cook some cuts to higher temperatures for a greater degree of doneness or because you prefer the flavor.

Raw Food In	ternal Temperature	
GROUND PRODUCTS		
Hamburger	160°F	
Beef, veal, lamb, pork	160°F	
Chicken, turkey	165°F	
BEEF, VEAL, LAMB		
Roasts and steaks		
medium-rare	145°F	
medium	160°F	
well-done	170°F	
PORK		
Chops, roasts, ribs		
medium	160°F	
well-done	170°F	
Ham, fresh	160°F	
Ham, fully cooked, as purchased	140°F	
Sausage, fresh	160°F	
VENISON	160°F	
POULTRY — CHICKEN, TURKEY, WILD GAME BIRDS		
Whole birds and all pieces	165°F	
FISH AND SHELLFISH		
Fish: flesh is opaque and flakes easily	145°F	
Shellfish: flesh is opaque and shells open	145°F	
EGGS		
Fried, poached	yolk and white are firm	
Casseroles	160°F	
Sauces, custards	160°F	
LEFTOVERS, CASSEROLES, STUFFING	i 165°F	

This chart has been adapted for home use and is consistent with consumer guidelines from the U.S. Department of Agriculture and the U.S. Food and Drug Administration.

■ Pack lunches and picnic foods with cold packs in insulated carriers, and don't leave out in direct sun.

UICK TIP. Keep hot foods hot (above 140°F) and cold foods cold (below 40°F). Avoid leaving foods in the "Danger Zone," the temperatures between 40°F and 140°F, where bacteria grow rapidly. Never let food sit out for several hours, even if you intend to eat it later.

LEFTOVERS

- **Divide** large amounts of leftover foods, such as soup, into shallow containers for quick cooling. For larger items, such as a whole turkey, cut meat off bones. Cover and place in the refrigerator or freezer.
- **Date** packages of leftovers and, as a rule, use within four days of refrigeration.

■ **Reheat** sauces, soups and gravies to boiling; reheat other leftovers until they are piping hot, 165°F throughout.

- Cover leftovers with a lid or vented plastic wrap when reheating by microwave. Stir foods several times to avoid cold spots, and let food stand for several minutes after microwaving.
- **Discard** leftovers and other foods that look or smell strange or are old. Never taste them harmful bacteria often do not change the taste or odor of food. Be careful with moldy foods; most should be discarded.

QUICK TIP. As a rule, if the mold isn't a normal component of the food (as with blue cheese), it shouldn't be consumed.

UNDERSTANDING FOODBORNE ILLNESSES

hy use food handling precautions at home? Because bacteria that we cannot see, smell, or taste can multiply to millions within a few hours at warm kitchen temperatures. Although most bacteria cause illness when they increase in large numbers, some (such as *E. coli* O157:H7) need only a few to cause illness.

Most instances of foodborne illnesses can be prevented by properly handling, storing, and cooking food to kill harmful bacteria such as

Salmonella, E. coli O157:H7, and Listeria; parasites such as Toxoplasma and Cyclospora; and viruses such as hepatitis A. Proper handling will also prevent development of toxins produced by Staphylococcus aureus and other bacteria.
